Overview

The **ChristocentricTrader Advanced Tiered EA** is a professional-grade Expert Advisor for MetaTrader 5, engineered for traders who demand precision, adaptability, and institutional-level logic — without the institutional price tag. Built on a multi-mode architecture with tiered licensing, this EA grows with you, unlocking deeper capabilities as your trading journey matures.

Whether you trade Forex, commodities, or synthetic indices, this EA delivers a structured, rules-based approach grounded in three pillars: **Smart Money Concepts (SMC)**, **AI-assisted scoring**, and **disciplined risk management**.

Key Features

Three Powerful Trading Modes

- **Classic Mode** — Clean, rule-based trend-following with structured entry and exit logic. Ideal for consistent, low-noise execution.
- **SMC Mode** — Full Smart Money Concept engine: BOS, Order Blocks, FVGs, and Liquidity Sweep detection. Trade with the institutions.
- **Advanced Mode** — Combines Classic and SMC logic with AI-informed score-based filtering and dynamic trailing stop management.

Multi-Symbol Market Watch Execution

- Automatically discovers and trades all active symbols in your Market Watch — no manual configuration. One EA, multiple instruments.

Score-Based Trade Filtering

- Every setup is evaluated through an internal scoring engine weighing trend alignment, structure confluence, and momentum. Only high-probability trades pass.

Dynamic Trailing Stop Logic

- Trailing stops adapt dynamically based on score strength, locking in profits intelligently rather than with fixed mechanical rules.

Telegram Signal Notifications

- Real-time trade alerts — entries, exits, and key events — delivered directly to your Telegram channel or group.

Tester-Compatible

- Fully validated for MT5 Strategy Tester with realistic simulation. Backtest with confidence before going live.

Tiered Licensing — Grow at Your Own Pace

Tier	Mode	Features	Suggested Price
Tier 1	Classic	Single-symbol, trend logic	\$30 / mo
Tier 2	Classic + SMC	Multi-symbol Market Watch	\$100 / mo
Tier 3	Full Advanced	Scoring engine, dynamic trailing, Telegram alerts	\$200 / mo

Recommended Minimum Balance

Tier	Mode	Min. Balance	Risk Setting
Tier 1	Classic (single symbol)	\$200 / 200 cents	1 – 2% per trade
Tier 2	SMC (multi-symbol)	\$500 / 500 cents	1 – 2% per trade
Tier 3	Advanced (full suite)	\$1,000 / 1,000 cents	0.5 – 1.5% per trade

Cent accounts are fully supported and recommended for smaller starting balances. These figures assume conservative risk settings — lower risk percentages may require proportionally higher balances for optimal lot sizing.

Who Is This For?

- Traders transitioning from manual to algorithmic execution
- SMC practitioners who want their concepts running 24/5 without screen time
- Multi-symbol traders seeking a single, centralised EA solution
- Anyone ready to trade with structure, discipline, and faith-backed consistency

Parameters & Customisation

The EA offers full control over risk percentage, lot sizing, ATR multipliers, entry mode, trailing stop sensitivity, Telegram integration, and more — all configurable from a clean input panel without touching the source code.

License & Activation

Licenses are account-bound and generated from your MT5 account number. Upon purchase, contact the vendor via Telegram to receive your activation key. Upgrading tiers is seamless — no reinstallation required.

■ Website	christocentrictrader.d9thprofithub.com.ng

Important Notes

- Requires a live or demo MT5 account for activation
- VPS recommended for uninterrupted 24/5 execution
- Past performance in the Strategy Tester does not guarantee future live results
- For setup assistance, onboarding support, and tier upgrades, reach out on Telegram

*"The disciplined mind, guided by faith and empowered by intelligent systems,
consistently outperforms the emotional trader."*
